

Satya, Watch Out!

READ ALOUD
FOR EARLY LEARNERS

Author: Yamini Vijayan

Illustrator: Vishnu M. Nair

Modified by: Sally Farneth and Maida McKenna

Satya can't stay still. He runs and jumps
and spins and rolls... and falls!

“Sit still,” says Father.

“Don’t break anything,” says Grandfather.

But what can Satya do?
His hands and legs are
always dancing.

Today is Sunday. Satya goes to the farm.

It is a long walk to the farm.

Satya hops like a rabbit and
sprints like a deer.

He crawls like a centipede and
slithers like a snake.

He swings like a spider
and leaps like a monkey.

He paddles like a duck
and swims like a frog.

He climbs like a lizard
and jumps like a goat.

It's time to go home.
Satya climbs on his
mother's back.

Grandfather bathes Satya.

Father cooks dinner.

Mother tells him a story.

In his dreams,
Satya runs and jumps and spins and rolls...

...and flies away!

How Do They Move?

Oh, the way Satya moves! Did you know that animals, birds, and insects also move in many different ways for many different reasons?

Like us, they move mainly to find delicious food, a cozy home, and a warm family. Some of them also move to escape from being caught and eaten by other animals. Find out how some of these creatures move!

Dolphins are famous for how they **leap** out of water. Can you **leap**?

Cheetahs are the fastest land animals. They can run really fast and **sprint** too, especially when they hunt. Can you **sprint**?

Crabs can walk sideways. Can you walk sideways?

Grasshoppers can jump really high, especially when they want to escape from being eaten. Can you jump really high?

Snails crawl slowly. Very, very slowly. Can you crawl slowly?
